PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience building scalable, responsive web applications with the MERN stack (MongoDB, Express.js, React.js, Node.js), Next.js, TypeScript, JavaScript (ES6+), Redux, and REST APIs. Delivered multi-vendor e-commerce, real-time bidding, and project management platforms for UK clients and company products. Strong in reusable component architecture, authentication, role-based access control (RBAC), and frontend performance optimization. Former Project Team Lead who mentored interns; now builds Python evaluation tooling for AI coding-model benchmarks.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Redux, JavaScript (ES6+), TypeScript, HTML5, CSS3, Responsive Web Design, Component-Based Architecture

Backend: Node.js, Express.js, RESTful API Design & Integration, Authentication & Authorization, Role-Based Access Control (RBAC)

Databases: MongoDB, Supabase

Languages: JavaScript, TypeScript, Python

Tools & Platforms: Git, GitHub, Vercel, VS Code, npm, Command Line (CLI)

AI-Assisted Development: Claude, ChatGPT, GitHub Copilot, Cursor, Windsurf

PROFESSIONAL EXPERIENCE

Software Engineer Jul 2026 – Present

Ethara AI | *Gurugram, Haryana*

- Build and maintain Python evaluation tooling for AI coding-model benchmarks as a core contributor to the Anubis terminal benchmark project.
- Author terminal and CLI benchmark tasks as complete packages: task instructions, grading rubrics, automated tests, and reference solutions.
- Write automated Python verification tests that validate model output against expected terminal behavior, covering edge cases and failure paths.
- Evaluate Claude and GPT-5.3 against authored benchmarks and run quality-check and peer code-review passes to keep grading deterministic and unambiguous.

Software Developer Sep 2025 – Jul 2026

RainStreamWeb Technology | *Ahmedabad, Gujarat*

- Developed the React.js frontend of a chat platform, backed by a reusable component library and a modular code structure.
- Integrated REST APIs for message delivery and user data, and centralized application state with Redux for predictable data flow.
- Optimized rendering and component reuse to improve application performance, scalability, and user experience.

Associate Software Developer Apr 2024 – Aug 2025

IndiaNic Infotech Limited | *Ahmedabad, Gujarat*

- Led a team of 2 interns as Project Team Lead (PTL): assigned tasks, reviewed code, provided technical support, and ensured on-time delivery.
- Engineered responsive React.js web applications for client and company products with a focus on performance, scalability, and maintainability.
- Designed reusable, modular UI components that streamlined feature development across the team.
- Integrated REST APIs and managed application state with Redux across complex, multi-module interfaces.

Frontend Developer Trainee Sep 2023 – Mar 2024

BasketHunt Pvt Ltd | *Remote*

- Created responsive user interfaces with React.js, JavaScript, HTML5, and CSS3, applying component-based architecture, REST API integration, and Git/GitHub version control.

PROJECTS

Dboroll – Multi-Vendor E-Commerce & Live Auction Platform (UK Client)

React.js, Node.js, Express.js, MongoDB, Supabase, REST APIs

- Built a multi-vendor marketplace where sellers list, manage, and auction products, with live bidding, highest-bid tracking, and automatic winner selection.
- Implemented secure authentication, profile, order management, and order tracking in a responsive, mobile-friendly interface.

Auction Marketplace – Real-Time Bidding Platform (UK Client)

React.js, Node.js, Express.js, MongoDB, Redux, REST APIs

- Delivered live bid updates without page reloads, separate buyer and seller flows, and full auction lifecycle management backed by MongoDB.

Ecosystem – Project & Employee Management System (IndiaNic)

React.js, Node.js, Express.js, MongoDB, Redux, REST APIs

- Developed role-based employee management, task assignment, daily progress reports, and project status tracking in a single MERN application.

Car Selling Showroom Management System auto-dealer-beige.vercel.app

Next.js, React.js, Node.js, JavaScript, CSS3, Vercel

- Built a role-based platform with Buyer, Seller, and Super Admin modules, CRUD for showrooms and car listings, car booking, and RBAC; deployed on Vercel.

EDUCATION

B.Tech in Computer Science – Medicaps University, Indore Aug 2020 – Jun 2024

CGPA: 8.76/10

CERTIFICATIONS

- Front-End Web Development using JavaScript and React.js – Bootcamp
- HTML/CSS Training – Open Weaver

LANGUAGES

English, Hindi
